

EUROPEAN COMMISSION

European Commissioner for Maritime Affairs and Fisheries

Maria Damanaki

maria.damanaki@ec.europa.eu

Dear ms Damanaki;

we refer to our statement of 10th of october 2010 **Anadromous stocks and TAC**
We are concerned about not receiving any conformation that you have received
our statement.

Will you stop the unnatural sea ranching of anadromous stocks and bring the fishing policy, which is based on the UN Convention on the Law of the Sea, part V, article 66 Anadromous Stocks, into force and if not, please tell us the reasons for continuing the fishing policy of today, which is based on neither the law nor the scientific facts about levels of wild salmon stocks, and which, as we all so well know, will certainly exterminate our wild salmon.

Pello the 20th of october 2010

Yours faithfully

Kalervo Aska
